# JET MANAGEMENT

# A TURNKEY PROGRAM

Our Jet Management program provides all of the benefits of owning a whole aircraft with none of the usual management and maintenance responsibilities, relieving customers of the burdens associated with owning and maintaining an aircraft. In addition, by placing an aircraft in the CitationAir™ fleet, enabling us to charter the aircraft to our other customers, a revenue stream is created for Jet Management aircraft owners that significantly defrays their costs.

Jet Management offers CitationAir whole aircraft owners a unique opportunity to have their Citation aircraft managed and maintained under the rigorous service and safety standards for which CitationAir is known.

What's more, Jet Management owners have access to our entire fleet of aircraft, so they're never grounded by routine maintenance or restricted by aircraft size. Jet Management aircraft owners can even arrange to use multiple aircraft simultaneously.

Our Jet Management program makes owning and maintaining your investment refreshingly carefree. While you, as the owner, are responsible for all operating costs, including fuel, maintenance and pilot services, our program provides a myriad of benefits in terms of efficiency and cost:

## **MAINTENANCE MANAGEMENT**

Who better to service your aircraft than the experts who manufactured it? The CitationAir maintenance team, at Cessna service centers, manages all aspects of maintaining your aircraft in accordance with Cessna's approved program. Cessna Service Centers are located throughout the United States and perform both unscheduled and scheduled maintenance.

## **PROPARTS PROGRAM**

Jet Management aircraft are automatically enrolled in Cessna's ProParts program, which supplies replacement parts required for scheduled and unscheduled maintenance.

## **ENGINE PROGRAM**

To reduce financial risks associated with engine maintenance and overhaul, Jet Management aircraft are enrolled in an engine program such as Pratt & Whitney's Eagle Service Plan, William's TAP Program or the CitationAir engine management program.

## **INSURANCE**

The insurance on the aircraft that covers the physical property of the jet and bodily injury liability up to \$300 million is purchased through CitationAir. As a result, owners enjoy the highly favorable rates reserved for large fleet operators with exemplary safety records.

## FUEL MANAGEMENT

Fuel savings enjoyed by Jet Management owners are significant. Taking advantage of fleet purchasing power, our fuel manager negotiates rates with fixed based operators, and the savings are passed on to owners.

## REGULATORY COMPLIANCE

Jet Management aircraft are placed on CitationAir's Part 135 Operations Specifications and FAR Part 91(k) Management Specifications at no cost, and owners are not assessed any ongoing administration fees.

## FLIGHT OPERATIONS AND SUPPORT

CitationAir's state-of-the-art Operations Center oversees nearly 100,000 flight hours of activity each year. Seasoned experts control all flight activity to ensure an unparalleled level of safety and service.

## ACCOUNT MANAGEMENT AND RESERVATIONS

Your personal Account Manager will oversee all day-to-day details such as taking reservations, ensuring accurate billing statements and monitoring the charter activity on your aircraft. In addition, Customer Service Representatives are available 24/7 to assist with reservations or any last-minute changes.
